Prof Guangshe Li
School of Chemistry
Jilin University
China

Dear Prof Li,

Re: Invitation as a Keynote Speaker on the 8th International Conference on Hydrogen Production (ICH₂P 2017)

The International Conference on Hydrogen Production (ICH₂P) is a multi-disciplinary international conference on the production of hydrogen through various methods as well as its use in various systems, including fuel cells. In ICH₂P 2007, we expand topic to other Energy Materials as well. It will provide a forum for the exchange of latest advances and technical information, dissemination of new research developments in the areas of hydrogen production and usage, and presentations involving the future directions and priorities in the hydrogen economy for a sustainable future. Since 2009 in Oshawa, ICH₂P has been held successfully for 7 times.

It is my great pleasure to invite you to attend the 8th International Conference on Hydrogen Production 2017 (ICH₂P-2017), to be held at Brisbane, Australia from July 28 to 31, 2017. ICH₂P-2017 will have a similar structure as past ICH₂Ps including Keynote lectures, parallel oral sessions and poster sessions. Due to your excellent research and high reputation in this field, I would like to extend my invitation to you as a **Keynote Speaker** on this conference. The official language will be English. The ICH₂P-2017 mainly focuses on the production of hydrogen through photo-catalysis, electro-catalysis and other methods, as well as its storage and usage. It will provide a platform for the exchange of latest advances, advanced technology, and new research developments in the areas of hydrogen production, storage and usage, and other emergent energy materials. I believe the conference will be successful due to the significant contribution from peers like you.

I look forward to meeting you in Brisbane Australia.

Yours sincerely
